# Joystick

HOME POSITION. To move the searchlight to the home position, press the Home button on the joystick. This will position the searchlight ahead with a tilted angle of 10° downward.

ON / OFF. Press the searchlight button on the joystick to turn the searchlight on or off.

MOVEMENT. The movement of the searchlight is dependent on the force applied to the joystick. By moving the joystick to the right or left, the searchlight move in that direction.

FOCUS. To adjust the searchlight focus, press and hold the joystick while moving the handle to the left for a wider beam or to the right for a narrower beam.

# Work SMART, Stay FOCUSED, Save TIME and Be SAFE

## Unique intelligent and lifesaving searchlight
